

Anthony Magnum RailTracTM Heavy Duty Hydraulic Liftgates[®]

Exclusive Anthony Feature
SLP[®] Self-Lubricating Runners

Lifting Capacities: 3,500 lb. 4,500 lb. 5,500 lb. 6,500 lb

Prepped with
Steel Shot Process

(See page 3)

ANTHONY
LIFTGATES, INC.®

Anthony: Industry Leader

Anthony Liftgates has been the driving force in the industry since 1941, producing innovative designs and quality products for trucks of all sizes. Our factory support is unmatched in the industry, providing dealers and their customers coast to coast with prompt delivery of products, parts orders, and custom engineering requests. Looking for a product you can stake your reputation on? Anthony Liftgates offers a wide range of models backed by the best warranty in the business. For performance, dependability, and value, Anthony delivers the complete package for every application!

Dual Pump and Motor Hydraulic Drive System

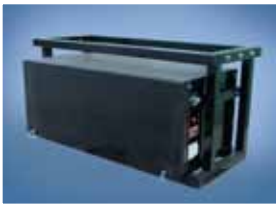

Standard dual pump and motor units provide twice the working capacity of single units with half

the effort, while providing a longer service life. Each unit will act as a back-up to the other, eliminating the need for an auxiliary pump and motor.

Power Unit Assembly

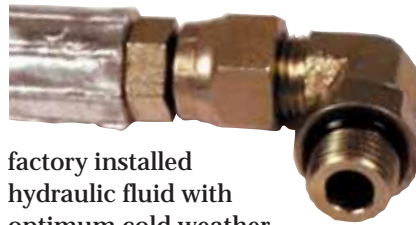

Our galvanneal powder coated power pack is divided internally into two compartments. One houses the dual pump and motor units, and the second houses the 2 auxiliary

12 volt batteries. Both have slide out trays for ease of service. A clear view reservoir and drain plug, louvered vents in the battery compartment, plus a convenient easy-on / easy-off mounting frame are also included.

ZLC™ Zero Leak Concept

The use of machined fittings, SAE "O" ring and JIC hydraulic connections, along with

factory installed hydraulic fluid with optimum cold weather usage specifications, mean you'll have long, trouble-free service with no aggravating and costly leaks.

Lifetime Warrantied Service-Free™ Sliders

Inside the vertical tracks there are no rollers or roller bearings to wear or replace. This can mean savings of thousands of dollars over the life of the Liftgate®.

LevelGuard™ — Self-Aligning Cylinder Attachment Ends

Platform lift cylinders are mounted on self-aligning swivel ends that prevent damage to cylinder pistons and internal wall scoring from platform side loading.

Service-Free Bushings

Used at critical pivot points, these composite bushings extend pin and arm life and eliminate routine lubrication.

Weather-Tight Connectors –

Designed specifically for off-highway and tough applications, these triple-ribbed silicone sealed plugs create a sealed electrical connection system that will withstand exposure to extreme moisture and temperature.

A Cable Carrier

securely holds both the wires from the traveling switch and the hose

from closing cylinder, inside the guide channel, protecting them while they flex in normal rising and lowering of platform.

Bolt-on Switch Box

The switch box housing is easily removable for quick & easy, efficient servicing or replacement. Inside, heat-shrink siliconed wire connections and potted switches seal out moisture, and stainless steel terminals provide extra corrosion protection.

Quality Standard Features:

Tail Lights

Standard incandescent lights in rear column are pre-wired and pigtailed for easy servicing.

Galvaneal Power Unit Enclosure

Separate vented battery compartment for two 12 volt batteries with easy access slide out power unit and battery service trays.

Marine-Duty Potted Toggle Switch

Operates reliably under all types of weather conditions.

Pressure Compensated Flow Valve

Provides constant and controlled lowering speed of the platform, loaded or unloaded.

Closed Hydraulic System

Provides positive protection against outside dust, dirt, and moisture; protects against hydraulic contamination.

Yellow Di-Chromate Plated Pivot Pins

Resist corrosion to increase service life.

Heat-Shrink Siliconed Wire Connections

Prevent electrical failure by sealing out moisture at all electrical connections and stainless steel fasteners on all electrical terminals provide extra corrosion protection.

Hard Chrome Plated Piston Rod

Helps keep exposed surface free of rust and contamination to protect seals and extend cylinder life.

Relief Valve

Prevents overloading during lifting cycle.

Factory Installed Hydraulic Fluid

Our optimum cold weather usage specified fluid is factory installed thus preventing contamination from field installations, while providing good performance during cold weather operations.

Super Cylinders

Built to last with longer piston and rod glands, dual wear rings, double-lip piston and rod seals ... translate into less downtime, lower maintenance, and more trouble-free operation.

Powered Platform

Toggle-switch controlled hydraulic system provides easy opening and powered closing.

Shot Blast / Powder Coat

All platforms and weldments are prepped with steel shot and then powder coated for a finish that provides the best surface appearance, impact resistance, coating adhesion, and wear resistance. Our finish has passed a 1,000 hour salt spray test.

Circuit Protection Device

A 200 Amp service protects truck wiring and power system in the event of a "dead short."

Shipped Ready to Mount

Each Anthony liftgate is factory assembled, energized, tested, pressure set, and oil filled to ensure the highest quality.

E-Z Mount Installation

Shipped completely pre-assembled for fast, clean, easy installation.

Cut-Off Switch

Protects valuable liftgate equipment from unauthorized use or vandalism.

Exclusive 3 + 3 Warranty

3 years on mechanical structure, 3 years on electrical / hydraulic systems, parts and labor. All Anthony Magnum RailTrac liftgates are serial numbered and computer logged for quick factory service identification, warranty and repair information.

Heavy-Duty Construction

Thick, 5/16 inch vertical rails and 1/2 inch thick overlays on the lower rail creates massive 13/16 inch thick dock contact area.

Gate shown in lowered position for dock loading

Optional bed height model in stored position (All capacities)

Optional 16" aluminum retention ramp for 60" & 72" model (Standard on 84" model)

12" pop-up cart stop (Standard on 60" & 72" models)

Available Models, Platforms and Capacities

Model	Lifting Capacity (lbs.)	Bed Height Min-Max	Platform Load Area and Ramp	Approx. Outside Width	Shipping Wt. (lbs.)
MRT-3500-SF	3,500	38"-58"	80" x 60"+12" ramp w/pop-up cart stop	96"	2,353
MRT-3500-SF	3,500	38"-58"	80" x 72"+12" ramp w/pop-up cart stop	96"	2,413
MRT-3500-SF	3,500	38"-58"	80" x 84"+16" aluminum retention ramp	96"	2,465
MRT-4500-SF	4,500	38"-58"	80" x 60"+12" ramp w/pop-up cart stop	96"	2,412
MRT-4500-SF	4,500	38"-58"	80" x 72"+12" ramp w/pop-up cart stop	96"	2,452
MRT-4500-SF	4,500	38"-58"	80" x 84"+16" aluminum retention ramp	96"	2,514
MRT-5500-SF	5,500	38"-58"	80" x 60"+12" ramp w/pop-up cart stop	96"	2,463
MRT-5500-SF	5,500	38"-58"	80" x 72"+12" ramp w/pop-up cart stop	96"	2,503
MRT-5500-SF	5,500	38"-58"	80" x 84"+16" aluminum retention ramp	96"	2,565
MRT-6500-SF	6,500	38"-58"	80" x 60"+12" ramp w/pop-up cart stop	96"	2,504
MRT-6500-SF	6,500	38"-58"	80" x 72"+12" ramp w/pop-up cart stop	96"	2,544
MRT-6500-SF	6,500	38"-58"	80" x 84"+16" aluminum retention ramp	96"	2,606

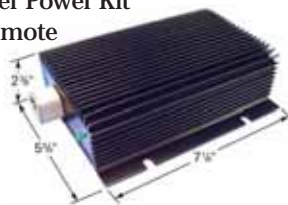

All models shipped with standard ramp ride platform.

Options for the Magnum RailTrac-SF Series

- Hand-held control with plug and socket
- Header kit
- Hose and wire channel mounting kit
- Auxiliary hand pump
- Bed height stored model
- Power down on demand

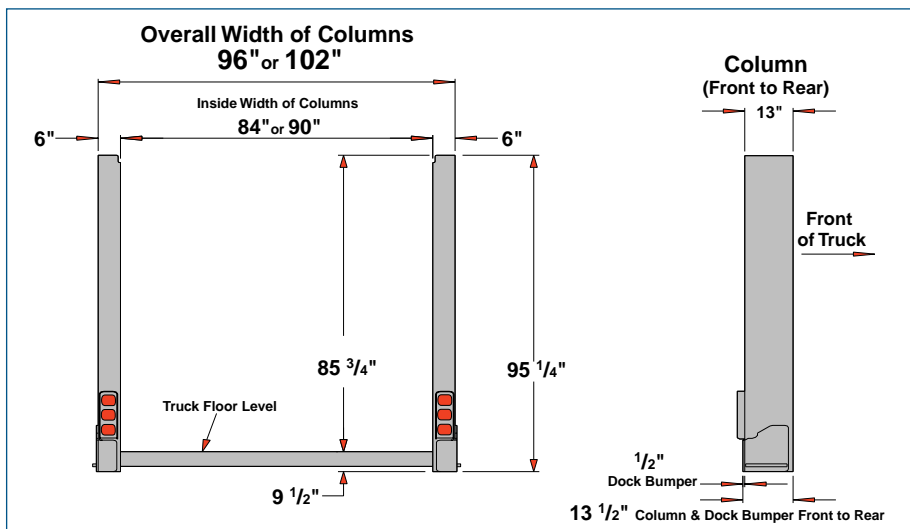

- 16" aluminum retention ramp
- Trail Charger Power Kit provides remote charging for liftgate batteries
- LED lights

- 102" wide models
- Trailer wiring kits
- Pump and motor extension kit
- Anti-slip platform coating
- Wireless hand-held remote control

Wireless remote kit includes receiver box and antenna, two remotes, mounting brackets.
